I like it, but it was scary
the parts of the deaths was
Scary.

8/10

Overall, I would give it a 4/5. There are some parts that aren’t the best. It’s for sure a must read. I love the characters especially Cam and of course Piper and Lili. On a side note I worship Cameron.

Frozen Charlotte is a must-read and I would recommend to all. It has great character arcs with intense plot twists. The book starts a bit slow and repetitive, but picks up midway. I would recommend the book for grades 5th-10th. Some characters did lack interesting qualities that make you want to read more, but the plot twists make up for it.

I really liked this story. The characters were very well written. Overall the main character had some serious character development. I also think that the villain arc was 10/10. Major plot twist that kept me on the edge of my seat. The story also had a very good plot, not too predictable. 4/5 recommend
Frozen Charlotte was an amazing book. It's about a girl named Sophie, who moves in with her uncle for while after her best friend dies. And there are crazy dolls all over the house. Overall, Frozen Charlotte was one of the best books I have ever read and I would recommend.

"CHARLOTTE IS Cold"

If you enjoy creepy action-packed novels, then this is the book for you. I personally liked the novel, but the one thing I disliked about it was the stereotypical creepy doll theme of the story. I did however enjoy the little poems they included that explained how the charlotte dolls were first created.

A lady froze to death in the 1840’s on her way to a ball, because she refused to wear a coat. You can find articles about it and old newspapers.
